

# Asbestos Still a Killer

Every year asbestos kills some 100,000 people – and will continue to do so over the coming decades.

Europe has banned asbestos – but millions of tonnes are still present. This must be removed safely!

Asbestos is found everywhere – in public and private buildings, in ships and in public transport.

The safe removal of all sources of asbestos has to be a European priority.

Europe must act – now! Don't pass the asbestos problem on to our grandchildren!
