

**Social Identity Cards & an EU approach to digital enforcement in the EU construction industry**  
*Opportunities, challenges and ways forward*

**Simultaneous interpretation in:  
6 languages, depending on registrations**  
**The conference will be a virtual event**

**14 December 2021, from 14:00 to 16:30**

## AGENDA

*Social ID cards are a successful model to prevent fraud and enforce applicable legislation on the European construction labour market. They contain data to identify workers, employers, working periods and contractual relationships, social security coverage, insurance information, or certificates on qualification and health and safety.*

*Sectoral national social partners in construction have a lot of experience with social ID cards. There are initiatives in several EU countries, such as Finland, Belgium, Spain, Italy, Norway, Austria, Sweden, Denmark or Romania.*

*At this e-workshop, FIEC and EFBWW will examine current developments and assess the connection with new EU initiatives for a European Social Security Pass and the digitalisation of enforcement.*

**13:45** **Online registration and login**

**14:00** **Welcome**

- Ramona Veleanu, FGS Familia, Laurentiu Plosceanu, ARACO, Cristian-Romeo Erbasu, FPSC - Romania
